

LOTUS PETAL SENIOR SECONDARY SCHOOL
GRADE - 8
SUBJECT - GK

Month	Chapter	Learning objectives	Teaching Methods	Learning Outcomes	Subject Enrichment Activity	Art Integration /Multi-Disciplinary
April 18	Largest and smallest in world and current affairs of the month	Understand the concept of the largest and smallest entities in the world.	Interactive discussion and visual aids to present global examples.	Students will identify and explain the largest and smallest things in various categories globally.	Create a chart comparing the largest and smallest animals, countries, or structures.	Use artwork or models to represent the largest and smallest objects, fostering creative expression while reinforcing factual knowledge.
May 11	Research centres in India and current affairs of the month	Explore the prominent research centers in India and their contributions to various fields.	Lectures, multimedia presentations, and case studies of key Indian research institutions.	Students will be able to identify major research centers in India and understand their roles in scientific advancements.	Create a presentation or poster on a selected research center and its groundbreaking work.	Design a visual timeline or map highlighting the locations and achievements of Indian research centers.
July 21	River Dams in India and current affairs of the month	Learn about the major river dams in India and their significance.	Discussions, videos, and interactive maps to understand the locations and functions of river dams.	Students will identify key river dams in India and comprehend their role in water management and energy production.	Create a model or infographic depicting major dams and their impact on the environment and economy.	Illustrate a river system with dams through a creative art project or diorama, incorporating knowledge from geography and environmental science.

September 7	Ports and Airports in India and current affairs of the month	Understand the importance of ports and airports in India and their role in trade and transportation.	Use of maps, charts, and videos to explore the locations and functions of key ports and airports in India.	Students will be able to identify major ports and airports in India and explain their significance in global trade and travel.	Create a map or digital presentation showcasing the locations and key facts of major ports and airports.	Design a creative representation of a port or airport, incorporating elements of geography and transportation in visual art.
October 15	Lakes and waterfalls in India and current affairs of the month	Learn about the major lakes and waterfalls in India and their ecological significance.	Use interactive maps, videos, and storytelling to highlight famous lakes and waterfalls.	Students will be able to identify key lakes and waterfalls in India and understand their geographical and environmental importance.	Create a booklet or poster showcasing the most famous lakes and waterfalls, including their location and unique features.	Illustrate a scene depicting a famous lake or waterfall, blending geography with artistic expression.
November 17	International organisations and current affairs of the month	Understand the role and significance of major international organizations in global affairs.	Lectures, discussions, and multimedia presentations on the functions and contributions of international organizations.	Students will be able to identify key international organizations and explain their impact on world peace, economy, and human rights.	Research and present on the objectives and activities of an international organization, such as the UN or WHO.	Create a visual representation (poster or model) of an international organization, combining knowledge from global studies and creative arts.
December 14	Logical reasoning and current affairs of the month	Develop critical thinking, problem-solving, and analytical skills through logical reasoning.	Use puzzles, riddles, brainteasers, and interactive quizzes to teach reasoning concepts.	Students will enhance their ability to analyze problems, identify patterns, and derive logical conclusions.	Organize a logic puzzle-solving competition or group activity involving reasoning games.	Combine reasoning with visual arts by creating flowcharts, mind maps, or solving geometry-based logic problems.
January 8	Revision and current affairs of the year	Mind games , brain exercise	Teacher can give some games/activity in classroom	Brainstorming	-Games and Activity	
February		Term – II Revision
